PROFESSIONAL PROFILE

Software Engineering undergraduate in a fully English-taught program and independent developer who takes web, mobile and backend products from concept to production. Builds secure, multilingual and performant solutions for real businesses with a focus on Next.js, Flutter and Supabase. Ready to learn quickly and take ownership in full-stack, front-end, mobile or backend internships.

EDUCATION

Bahçeşehir University

B.Sc. in Software Engineering - 100% English

Istanbul, Türkiye | Sep 2024 - Expected graduation: Aug 2028

Relevant coursework: Introduction to Programming with Java, Object-Oriented Programming, Software Security, Software Engineering Analysis and Design, Database Management Systems.

BAU English Proficiency Examination: C1 (77/100)

Turkmenabat City General Secondary School No. 4

High School Diploma

Turkmenabat, Turkmenistan | Graduated: 2024

SELECTED PROJECT EXPERIENCE

Consultancy Management Panel

Actively used by a real business

Next.js 14, TypeScript, Supabase, PostgreSQL, Chart.js

- Modernized a 9,400-line legacy PHP panel into a secure and maintainable Next.js application.
- Unified client, residence permit and visa tracking, WhatsApp workflows, CSV/Excel transfer, multilingual UI and role-based security.
- Reduced page load time from 3.1 seconds to 0.5 seconds by relocating server functions and parallelizing database queries.

3 weeks

Orta Asya Consulting

Production project for an active business

Flutter, Supabase, PHP, Firebase FCM

- Built the consultancy's mobile application, website and management workflow from the ground up.
- Implemented multilingual content, secure data management, admin integration and push notification infrastructure.
- Managed the iOS App Store release and public website deployment.

4 months

PROJECTS - CONTINUED

PetDrip

Live on the App Store

2 months

Flutter, Dart, Supabase, RevenueCat, Generative AI

- Designed and developed an AI-powered virtual outfit try-on application for cats and dogs.
- Built the end-to-end flow for selecting an outfit, capturing or uploading a pet photo and visualizing the selected look on the same pet.
- Managed credits, in-app purchases and the complete App Store release process.

GEŇLIK

Live web project

1 month

Next.js, TypeScript, Responsive Web

- Owned the design, content, development and deployment of a Turkmen-language women's fashion storefront for the Turkmenistan market.
- Presented collections, new arrivals and campaigns through a fast, modern and mobile-first interface.

ADDITIONAL PROJECTS

- Personal Portfolio and Admin Panel - Next.js, Supabase
- LOVE BALLOON - Russian-language delivery storefront, Next.js
- Visa Appointment Panel - Next.js, Supabase SSR, n8n automation
- Vitrivo - Native iOS application, Swift and Xcode

TECHNICAL SKILLS

WEB	Next.js, React, TypeScript, JavaScript, HTML, CSS
